

## AFLI Series Specifications <u>Automatic Flow Limiter w/ Integral Ball Valve</u> A: AFLI - ½" - 1" L

PRODUCT DESCRIPTION: The AFLI is an Automatic Flow Limiting device, union end by fixed end, with an integral full port ball valve, rated at 600 WOG @ 250°F. The AFLI is supplied with a stainless steel flow limiting cartridge that can be removed for cleaning, inspection, and cartridge exchange, if necessary. The AFLI comes standard with two pressure/temperature ports and a hanging ID tag for easy identification. The fixed end system or, pipe run-out side, is available in SWT or FNPT. The union side connections available include MNPT, FNPT, SWT, and a variety of reductions.

<sup>\*</sup> Custom flow rates can be calibrated at the factory for an additional charge.

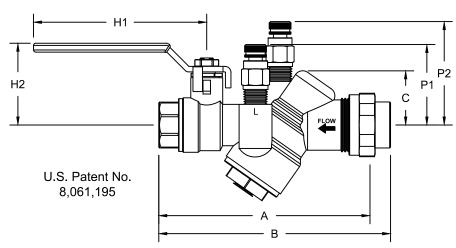

## PRODUCT SPECIFICATIONS:

- Flow measurement capability for problematic systems, high performance coils, or projects where verifiable sustainable energy savings is desirable
- Stainless steel construction on all flow cartridge wear surfaces
- Static orifice design that maximizes the size of the flow orifice across large pressure differentials
- Large operational differential range across the flow cartridge
- Provides continual flow at differential pressures above design limits
- Removable cartridge for cleaning or exchange if required
- Flushing through the cartridge body in case debris gets inside the cartridge (optional drain/flush valve available)
- Low start-up pressure to operate with low energy requirements

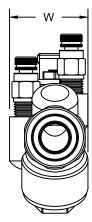

The information presented on this submittal is correct at the time of publication. US Industrial Sourcing, L.L.C. reserves the right to change design, and/or material specifications without notice.
